## How To Use The Order Form:

Use the Order Form to keep track of your orders. Each Column can be tracked as a separate order. Write in the desired quantity of each product in their corresponding square. You can then add up how much each customer owe's and put that amount in the bottom Customer Total field. Collect those funds and turn them into your organization's management.

To submit an order, use the "Product Total" column to sum up the total number of each product across all your orders. Once properly filled out, return the order form along with payment to your organization. Please make a copy or take a picture of your order form for your records.
